

## Window Check

For a better user experience, this survey requires your browser window width to be 600 pixels or larger. Most personal computers and tablets have a larger screen size than that. However, usually smartphones have a screen size smaller than that.

In the next page, we will calculate the browser window size. If you see this survey not in full screen, please make it full screen before proceeding.

## Consent

### Consent Form

We (Nuffield CESS) are a group of researchers based at the University of Oxford, United Kingdom. We are conducting research on health and economic issues. The data collected in this survey will only be used for the purposes of the study, and your privacy and anonymity will be maintained.

It is very important for the success of our research project that once you have started the survey you complete it fully. This survey should take (on average) about 20 minutes to complete.

Please read the following statements carefully and answer the question below.

### Our Commitments and Privacy Policy

In this survey, all information participants get is true. This implies:

- We never deceive participants. For example, if we inform you that another participant is making a choice on which you can then react, this is indeed the case.
- We keep our promises made to participants. For example, if we promise a certain payment, participants will indeed receive it.
- In the event that we are responsible for a mistake that is to the disadvantage of participants, we will inform and compensate the respective participants.
- We design, conduct and report our research in accordance with recognised scientific standards and ethical principles.

We adhere to the terms of our privacy policy as stated below.

- The data in the participants' database will only be used for the purpose of the study
- There is no link between the personal data in the participants' database and the data collected during a study.
- The generated anonymous data will be used to write a report and to give presentations. The end products will be publicly available.
- Your participation in this study is purely voluntary, and you may withdraw your participation or your data at any time without any penalty to you.

If you have any questions about this study, you may contact us at [cess@nuffield.ox.ac.uk](mailto:cess@nuffield.ox.ac.uk)

Please confirm you have read the consent form above and understood it.

- ☐ Yes, I have read the above statement and understood it
- ☐ No

## Instructions

Welcome

This is a survey on health and economic issues. You will be asked to complete tasks and answer questions related to these issues.

You must complete each task fully before you move on to the next. You will not be able to return to a task once completed. The instructions for each of the tasks will be provided at the corresponding time. You will earn a participation payment of 1000 Pesos. **In some questions you will be able to earn some extra money.** The questions that offer the opportunity of extra earnings will be clearly labelled. Other questions that involve money are only hypothetical.

Payment will be done though PayPal, for which we will ask you to provide an email at the end of the survey.

We aim to pay all participants within two weeks of having taken part in this study.

Please rate the likelihood that you think COVID-19 can spread from someone who has no symptoms? (1=very unlikely; 10=very likely)

Very unlikely

Very likely

1 2 3 4 5 6 7 8 9 10

Please indicate

Now suppose a few new cases of COVID-19 were reported in your area, please indicate the chance you would voluntarily do the following -- **without any mandate from the authorities**. When I ask a question I'd like for you to give me a number from 0 to 100, where "0" means that you think there is absolutely no chance, and "100" means that you think the event is absolutely sure to happen.

## Corona Experience

Do you know of any people around you who were COVID-19 confirmed positive? If so, how many? (Please fill in a number. If none, please put 0.)

Do you know of any people around you who had symptoms of COVID-19 although they were not officially tested? If so, how many? (Please fill in a number. If none, please put 0.)

Do you know of any people around you who died from COVID-19? If so, how many? (Please fill in a number. If none, please put 0.)

## GPS

Please tell me, in general, how willing or unwilling you are to take risks, using a scale from 0 to 10, where 0 means you are “completely unwilling to take risks” and 10 means you are “very willing to take risks.” You can also use any number between 0 and 10 to indicate where you fall on the scale, using 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, or 10.

Please think about what you would do in the following situation. You are in an area you are not familiar with, and you realize that you lost your way. You ask a stranger for directions. The stranger offers to take you to your destination.

Helping you costs the stranger about **2400 Pesos** in total. However, the stranger says he or she does not want any money from you. You have six presents with you. The cheapest present costs **600 Pesos**, the most expensive one costs **3600 Pesos**. Do you give one of the presents to the stranger as a “thank you” gift?

Investing 5% of your annual income in a conservative stock.

Investing 10% of your annual income in government bonds.

## Beliefs

Next we would like to ask your opinion about how likely you think various events might be. When I ask a question I'd like for you to give me a number from 0 to 100, where "0" means that you think there is absolutely no chance, and "100" means that you think the event is absolutely sure to happen.

For example, no one can ever be sure about tomorrow's weather, but if you think that rain is very unlikely tomorrow, you might say that there is a 10 percent chance of rain. If you think there is a very good chance that it will rain tomorrow, you might say that there is an 80 percent chance of rain.
